Re: <u>Document 8 (JP3-139542A)</u>

We would like to comment on 8, as follows:

Document 8 discloses that an acrylic modified polyolefin resin is used in an injection-molding process. However, in document 8, the acrylic-modified polyolefin resin is used for making an injection-molding resin itself, not a decorative sheet.

On the other hand, an acrylic-modified polyolefin resin is used for making a resin layer (adhesive layer) of a decorative sheet to be adhesively bonded to an injection-molding resin.
